The institution provides all-round support to students not only academic but tries to provide the personal touch by introducing Mentor-Mentee system. Under this programme, guidance and counseling is provided to the students, both at the academic and personal level by the faculty members. Under this system, the teacher is assigned a small group of students called Mentees, the mentor faculty takes cares of those students till completion of their graduation straight from first year. Mentor faculty regularly interacts with the mentees. This system helped a lot to strengthen the personal relationship between students and teachers and students not only able to express their feelings , needs and came up with several issues as they can see a friend, mentor and counsellor in a teacher. The primary aim of mentor is to create safe space for a mentees outside the classroom informally. Faculty members invite their mentees for conversation and discussion regarding any issue that their mentee may be facing. Additionally, the mentor also offers career guidance, and makes efforts to help all the way to mentee for his/her progress at next level.

To setup a process for the effective use of academic facilities and infrastructure facilities. This policy is mainly adapted to execute the following types of facilities available in the college such as Administrative Office, Auditorium/Conference Hall/Classrooms, Improved Gym and Standard Sports Pavilion, Library and Study Room, Research Laboratories

Administrative Office : Well Established fully automated administrative office is the crown to the college. Office is equally accessible academically to all the HODs of the various Department (UG and PG), staff members. The Principal allocate the time to access the office.

Auditorium Hall Conference Hall: Auditorium Conference hall is allocated jointly by respective convener and Principal. For various academic and extracurricular activities, Auditorium Conference Halls are allocated. Auditorium Conference hall are also accessible to the external users with prior permission of the authority.

Gym Sport pavilion: College authority laid down the rules for the efficient use of Gym Sports facility available in the college sport pavilion. Guidelines for the use of Gym Sport pavilion is displayed in the sports pavilion. College authority has got all the rights to change the guideline. Sports facilities available in the college are mainly used to carry the competition, sports education and recreations by college students.

Class Room Assignment: Time table committee and Principal look after the efficient use of classrooms based on the strength of the subjects. Appropriate classrooms are allocated to the students time table committee also allocates the "ICT" based classrooms for student's seminars, interaction and Quiz. Grievances given by the students or faculty is brought to the notice of time table committee and problem is resolved satisfactorily. Classrooms can also be used by external users such as conducting the competitive examination, civil service examination etc without affecting the academic calendar of event. However, prior permission is need by the authority to use the class rooms.

Laboratory use: Head of the department, time table committee allocate the laboratory classes without causing any

hindrance to the student. Care is taken to ensure that whether the student is using the laboratory efficiently or not. We notices regularly the activities of the students through the login register of the Libratory. Library : Student has to fill the membership form to become the member of the library. Student ID card is issued by the librarian in consultation with Principal. Students are given two books on ID and same may be returned within a week. Library is fully automated and the information about the availability of book, journals, magazines etc. can be accessed from the Department itself. Examination Branch: College has a separate examination branch where the students submit their application for their semester examination application

7.2 – Best Practices

7.2.1 – Describe at least two institutional best practices

Best practice 1: Title of the practice: Teachers using ICT for effective teaching Objectives of the Practice: a. To promote the skill of learning and to improve the learning outcomes to provide "head-heart and hand approach" to learning to communicate and collaborate to provide hands-on and heads-on experience to develop learning resources to use multimodal representations, multimedia and hypertext possibilities to have an unlimited access to authentic resources to support the process of learning to accelerate the teaching and learning efficiency to motivate students towards innovative learning to enrich the process of learning. The context: b. The classic methodology of teaching, Chalk-Talk-Walk technique has certain limitations such as board management, neat diagrams, and hand writing skills Curricula are developed to emphasize capabilities and concerns towards the application of the information. Information Communications Technology (ICTs) are able to provide strong support for all these requirements and there are now many outstanding examples of world class settings for competency and performance-based curricula that make sound use of the affordances of these technologies. The integration of information and communication technologies can help revitalize teachers and students. The usage of ICT is to complement the classical teaching techniques particularly in difficult subject areas. To achieve these objectives, teachers need to be involved in the preparation of online teaching resources, multimedia presentation and developing online video lectures. Teachers generate meaningful and engaging learning experiences for the students, strategically using ICT. ICT enable students to enjoy enquiry based innovative learning techniques. ICT is inevitable in modern era. The concept of digital libraries where the students, teachers and professionals can access research and course material from around the globe instantaneously is possible due to ICT based digital resources. Also sharing of knowledge which is essential for the development of well-informed society is possible now due to networking of academics and students for sharing scholarly materials and innovative ideas. The implementation of ICT in education develops higher order skills such as collaborating globally and solving complex real-world problems. It improves the perception and understanding of the world of the student. Thus, ICT can be used to prepare the workforce for the well informed, skillful society and enhance the global economy. The practice: c. ICT enabled teaching methodologies are being followed by the faculty members in class rooms as a complementary tool for conventional teaching methods. The academic plan with budget, notes of lesson, lab manuals and question banks with key are made available at the very beginning of the semester digitally. Sufficient number of books, journals, e-journals and e-books are available in the library. The research journals are available online and facility for accessing these journals is provided through proxy server in the campus. Every year, all the departments conduct seminars, workshops and guest lectures on the new developments in the core subjects for

effective teaching and learning by the faculty members and students. Language lab and communication skill laboratory help the faculty to enhance knowledge in the field of English communication and writing skills. Seminar halls are equipped with multimedia facilities. Invited talks and webinars are conducted in seminar hall using ICT facilities. Evidence of success: d. The multimedia presentations, video lectures and links developed and provided by the faculties belonging to different disciplines. The hits, following up of the above-mentioned videos by Students, feedback and comments. Problems encountered and resources required: e. The major problems encountered are, non-availability of smart phones among rural students who are in large numbers in our Institution. High-speed internet facility with Wi-Smart boards with proper acoustics. Best practice 2: Title of the Practice: Improving Teaching and Learning Process Objectives of the Practice: a. To achieve the principles of the teaching / learning process which are multi-dimensional. The principles on the basis of which this best practice adopted were to promote the interest of a student in a specific topic, to inspire the students to question the noticeable and to increase the interface in the class. The Context: b. Rapid progress in technology is one of the chief issues that affect the teaching/learning process. The facilitators find it problematic to keep up the interest among the learners. Further there is rapid transformation taking place in technology which intensifies the problem. Keeping the audience enthralled throughout the lecture is another challenge. The facilitator is required to use a variety of tools to keep the learner engaged in the learning process. Having access to a variety of tools all the time may not be possible. Today knowledge is just a click away to the learner a challenge faced by facilitators is to keep pace with the latest news and happenings. The teaching/learning process is given immense importance in the institute. The institute is as good as its students. The students are as good as the teachers. The Practice: c. The teaching /learning process starts with designing of a lecture plan by the facilitator. The lecture plan is given in advance to the learners. The facilitator initiates a discussion or tells a story or questions the learners before defining the objectives. The objectives of the lectures are defined to specify to the learner the learning outcomes. During the lecture, discussions and questioning is encouraged. Various forms of assessment are used for continuous evaluation such as group discussions, assignments, Power Point presentations, class test to name a few. An aspect very unique about our teaching / learning process is the freedom given to learners to share their views and ideas. Even ideas that sound impractical are discussed and a proper explanation is given to the learners why they cannot be implemented. The learner is the part of the learning process rather than just a spectator of the same. IQAC motivates the faculty to adopt Innovative processes in Teaching and Learning process. These Innovative teaching approaches which are a combination of the traditional lecture method along with other methods helps the young minds to increase their learning capacity and global competitiveness. Visits to the library and access of internet helps to know about the latest trends in technology and many novel applications. Blending these novel applications with the theoretical concept always helps to bring students close to the concept. Conduct of Career Guidance and counselling activities as a part of regular timetable which help students to acquire potentials to mold them according to their future goals and ambitions. Conduct of Sports to students to make them strong physically and mentally which indirectly helps to improve the learning skills. Through organizing Industrial/Educational tours and visits to various companies, industries help students to gain real experience about the outside world. Conduct of Co-curricular activities like Inter-collegiate competition, Science Exhibitions, conduct competitions in Quiz, Poster presentations, project reports etc. to build competitive and organizational skills in the students. Conduct of coaching classes helps the students to improve skills to face competitive examinations. Conduct of remedial classes and special classes for

slow learners so as to improve the learning skills of the student. Deputation of students to conferences, seminars and workshops which in turn helps the students to acquire paper presentation /preparation, communication and event participation skills Evidence of success: d. The evidence of success is visible, qualitatively as well as quantitatively. The results bring some prominent factors to light. Some of the factors are that students when shown the right direction and given the right encouragement can achieve the goals they desire. Holistic development rather than only academic success contributes in creating socially sensitive individuals which is a prominent requirement of educational institute. Problems encountered and Resources Required: e. The non-availability of technology is one of the major problems encountered in the teaching learning process. Further, encouraging discussions in the lecture becomes self-obliterate towards its aim, at times. Questions posed by learners may not be to find an answer to the problem but to test the knowledge of the facilitator. The span of interest of the learners is very short. Teachers today have to play the role of an educator and entertainer combined, rather than just an educator. Resources in terms of finance are continuously required to upgrade technology requirements. Activity based games cannot be implemented due to the paucity of space.
